

**St Leonards 9439-3655**

**Alexandria 9693-2225**

**Parramatta 9806-9155**

## **PAC170A**

Dimensions

580mm (w)

375mm (d)

1050mm (h)

**Weight: 16.5kg**

### **PAC170A/125 Small Portable Evaporative Cooler**

- **Great for a small area**
- Evaporative Coolers use evaporation to cool the air. In an evaporative cooler a pump circulates water from the 40 Litre reservoir on to a cooling pad, which becomes very wet. The fan draws air from the area through the damp pad, as it passes through the pad the air is cooled by evaporation
- Less expensive to operate around one quarter of the cost to run a portable AC unit
- Evaporative cooling increases humidity. In dry areas or low humidity, this may improve comfort and decrease static electricity problems
- Area covered up to 30m<sup>2</sup>
- LED Control panel with option remote control
- Airflow = 1111 Litres / second
- Current = 0.78amps
- Water consumption around 3 to 8 Litres / hour
- **Ideal for Offices and areas that cannot accommodate a Portable Air-Conditioner**
- Installations are made simply, without structural changes
- Relatively quiet operation <61dB at 1 m, 4 speed
- Fitted with "Electric Leakage protection switch"
- Easily portable yet quite powerful & effective

Date: ____ / ____ / 202	Airpower Hire Estimate Details
Your Reference Number Quoted:	<b>E- 202</b> - ____ - ____
Your hire rate quoted:	\$ _____ per (week / day) per unit
For a minimum hire period of:	_____ (day / week / weeks)
