PAC280A

Dimensions

910mm (w)

480mm (d)

1380mm (h)

Weight: 38kg

PAC280A Large Portable Evaporative Cooler

- **Ideal for Halls, factory areas, events, marques etc**
- Evaporative Coolers use evaporation to cool the air. In an evaporative cooler a pump circulates water from the 120 Litre reservoir on to a cooling pad, which becomes very wet. The fan draws air from the area through the damp pad, as it passes through the pad the air is cooled by evaporation
- Less expensive to operate around one quarter of the cost to run a portable AC unit
- Evaporative cooling increases humidity. In dry areas or low humidity, this may improve comfort and decrease static electricity problems
- Area covered around 30 to 60m²
- LED Control panel with option remote control
- Airflow = 2200 Litres / second Current = 1.3amps
- Water consumption around 3 to 10 Litres / hour
- Installations are made simply, without structural changes
- Relatively quiet operation <64dB at 1 m, 3 speed
- Fitted with "Electric Leakage protection switch"
- Easily portable yet quite powerful & effective
- Loose ice cubes may be added to have a "cooler effect"

Date: ____ / ____ / 202	Airpower Hire Estimate Details
Your Reference Number Quoted:	E- 202 - ____ - ____
Your hire rate quoted:	\$ _____ per (week / day) per unit
For a minimum hire period of:	_____ (day / week / weeks)
Delivery / Setup / Pickup fee being:	\$ _____
