Covid-19 Response Plan 2021 -U4

We want to assure all our clients that we are putting strategies in place to help prevent the spread of the coronavirus.

What are we doing to keep safe?

At Airpower Climate Hire we are taking extra sanitary precautions:

- All our equipment is immaculately presented, as always cleaned with utmost care, using the latest products from manufacturers like Wurth and now we add an **extra disinfecting step at the end of the cleaning process using Forcefield NANO Technology 4 in 1 Disinfectant and Protector controlling 99.99% of germs**, adding an extra layer of protection, giving the end user total peace of mind.
- **4 in 1 is also listed in the Australian Register of Therapeutic Goods (ARTG) to kill Covid-19 for 30 days.**
- Our vehicles will be carrying hand sanitisers to be used before entering premises.
- We have available disposable gloves when entering premises – if a site requirement
- **As a government issue, we will be wearing masks while on-site.**
- We will stay the recommended 1.5 metres away from anyone.
- We will limit our transactions with you or your client - only where required, to help the safety of both parties.
- We have received Certificate of Acknowledgement from Australian Government Department of Health for Darren Furzer, completing e-learning course in "Infection Control Training -COVID 19".

How can you help?

For us to keep our services, especially into the cooler winter period, we would ask you to:

- Postpone any installation if any staff members are feeling unwell or showing symptoms.
- Keep the recommended 2 metres away from installers when they are in your office.

Our staff are working from home and or factory office so we can continue to offer you the same 24 hour / 7 days emergency response service that you are currently used to. Let us work together so we can make sure you stay warm and safe over this upcoming winter period.

Kind Regards

Darren Furzer
