## Covid-19 Response Plan 2023 -U9

We want to assure all our clients that we are continuing to put strategies in place to help prevent the spread of the coronavirus and other flu like symptoms.

What are we doing to keep safe?

At Airpower Climate Hire we are taking extra sanitary precautions:

- All our equipment is immaculately presented, as always cleaned with utmost care, using the latest products from manufacturers like Wurth and now we add an **extra disinfecting step at the end of the cleaning process using Forcefield NANO Technology 4 in 1 Disinfectant and Protector controlling 99.99% of germs**, adding an extra layer of protection, giving the end user total peace of mind.
- **4 in 1 is also listed in the Australian Register of Therapeutic Goods (ARTG) to kill Covid-19 for 30 days.**
- Our vehicles will be carrying Forcefield Sanitiser + Protector to be used before entering premises.
- **If required as a government issue or customer requirement, we will be wearing masks while on-site.**
- We remain vigilante and continue to keep a safe distance in large gatherings.
- We have received Certificate of Acknowledgement from Australian Government Department of Health for Darren Furzer, completing e-learning course in "Infection Control Training -COVID 19".

### How can you help?

For us to keep our services, especially into the summer period, we would ask you to:

- Postpone any installation if any staff members are feeling unwell or showing symptoms.
- Keep the recommended 2 metres away from installers when they are in a confined area.

We can continue to offer you the same 24 hour / 7 days emergency response service that you are currently used to. Let us work together so we can make sure you stay warm and safe over the summer period of 2023 / 2024, making the environment a safer place for all.

Kind Regards

**Darren Furzer**
